acQuire returns to IMARC 2025 as a silver sponsor spotlighting data-driven productivity

Sydney, Australia – 20 October 2025 – acQuire Technology Solutions (acQuire) is set to appear at this year's International Mining and Resources Conference (IMARC), joining as a silver sponsor and exhibitor at Australia's premier mining event.

From 21–23 October, the global mining community will gather in Sydney to discuss the industry's future and acQuire will be right at the heart of the action at **booth B14**.

This year's conference theme, *"Strengthening Supply Chains, Optimising Costs, and Driving Productivity,"* sets the perfect stage to connect with industry leaders like acQuire, and explore how the sector is adapting to meet the growing global demand for minerals and metals.

As mining companies look to improve efficiency, meet compliance standards, and deliver sustainable value, acQuire brings to this year's IMARC nearly 30 years of experience helping miners turn data into insights that enable confident, data-driven decision-making. Their range of software solutions address the data challenges encountered across the different areas of the mining value chain.

"IMARC creates a great forum for us to meet with our mining customers, engage like-minded industry experts, hear about the emerging challenges and trends, and participate in the future of mining, as we know data will remain central to that," says Louise Dewar, APAC Operations Manager at acQuire. "We're excited to share how our solutions help miners strengthen their operational efficiency, reduce risk, and make more decisions with confidence."

acQuire presents the ripple effect of data on decisions

Stuart van de Water, Sustainability Portfolio Leader, will take the stage as part of the official IMARC conference program. His session, *"The Data Ripple and the Law of Unintended Consequences"*, explores the ripple effects of data decisions and how efficiencies in data management can unlock productivity gains throughout the mining value chain.

Catch Stuart live at IMARC session at IMARC: further details can be found here [hyperlink: <https://www.acquire.com.au/event-bookings/conferences-tradeshows/imarc/>]

What's new at the booth?

The acQuire team has been working behind the scenes on exciting updates across its product suite. IMARC will offer attendees a first look at what's coming next with two major software releases set to launch in the next month for:

- GIM Suite, acQuire's enterprise geological data management solution, and
- EnviroSys, acQuire's quality and compliance-focused environmental data management solution,

Attendees will also have the opportunity to explore acQuire's newest product:

- GIM Essentials, enabling resource development teams to get the groundwork right on their geological data.

Whether you're starting your next drilling program, or managing multi-site mining operations, the acQuire team will be on hand at booth b14 to share how their software can adapt to your needs and grow with your operation.

Let's connect at IMARC

acQuire's brand and industry leadership has been built from innovation and is trusted by thousands of users and earth scientists globally. They continue to create great software that turns data into insight for their customers. Explore how acQuire's solutions can help you make confident, data-driven decisions at IMARC 2025.
