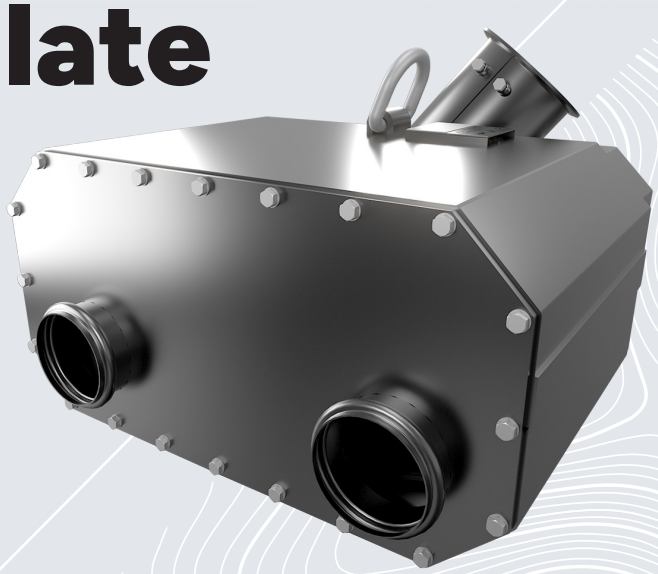
# Diesel Particulate Filters



## Tough on emissions, easy on maintenance

When emissions compliance threatens operations, our retrofit and maintenance solutions provide a cost-effective way to meet regulations, protect workers, and extend equipment life—without expensive fleet replacements.

Mammoth's Diesel Particulate Filters (DPF) are engineered to physically capture up to 99.99% of diesel particulate matter (DPM).

Our DPF range, offer solutions for all diesel-powered applications, meeting the most demanding standards of performance, quality and engineering.

**Protect people & the environment**

**Reduce DPM by 99.99%**

**Remove and replace to suit existing muffler**

**Quality Australian made parts**

### Diesel Particulate Filter Features

- Partial flow and full wall-flow DPFs for heavy-duty and light duty cycle requirements
- Cross-reference and part numbering
- Made of heavy gauge or mild stainless steel
- Strategic stock holding for minimal downtime
- Machine specific backpressure monitor and data logger kits available

### Diesel Particulate Filter Benefits

- Reduces DPM output by 99.99%
- Passively regenerates
- Easy and convenient bolt-on replacement parts that fit existing brackets
- Refurbished and replacement parts available
- Custom design solutions
- Retrofit - Replaces the OEM muffler in most diesel-powered equipment

**Why use Mammoth?**

Mammoth is a world-leading equipment and power system solution provider. We offer a broad range of innovative bespoke and universal solutions to the mining, transport, rail, industrial, agriculture and marine industries globally.

Our success is based on delivering innovative integrated solutions, our ability to build strong relationships, and most importantly, strengthen our customers' businesses.

To learn more about how our custom exhaust systems can benefit your operation, **contact our team today!**
