MAMMOTH

ZERO HARM
Think Safe | Work Safe | Home Safe

Selective Catalytic Reduction Systems

Compliance Without Compromise

From Tier 1–3 retrofits to Tier 4/Stage V system maintenance, our emissions solutions reduce diesel particulate matter, improve air quality, and extend fleet life.
Every solution is engineered for compliance, reliability, and cost-efficiency.

Our SCRs run longer, operate better, and fail less — minimizing downtime and fault codes so your fleet keeps moving.

Our SCRs deliver OEM performance at up to 50% less cost — reducing your cost-per-hour without sacrificing uptime.

Protect people & the environment

Breakdown NOx and NO2 into N2 and H2O

Engineered and manufactured to fit without modification

Quality Australian made parts

Selective Catalytic Reduction Features

- Built to match or improve on the OEM specification (housing materials and catalyst)
- Precision engineered and manufactured to fit the existing footprint with no modifications
- More cost effective
- Strategic stock holding for minimal downtime
- Can be matched using the OE manufacturer part number

Selective Catalytic Reduction Benefits

- Remove considerably more than 90% of major diesel exhaust pollutants
- SCR rebuilds are tailored to extend life and restore OEM-level performance
- Custom design solutions
- Full cleaning, repair, and re-coating available
- Meet Euro 4 and 5 emission standards

Why use Mammoth?

Mammoth is a world-leading equipment and power system solution provider. We offer a broad range of innovative bespoke and universal solutions to the mining, transport, rail, industrial, agriculture and marine industries globally.

Our success is based on delivering innovative integrated solutions, our ability to build strong relationships, and most importantly, strengthen our customers' businesses.
