Philippines Program: Building Integrated and Resilient Industrial Ecosystems: Advancing Growth through Philippines-Australia Cooperation on Strategic Industries

This session will present the Philippines' investment proposition as Southeast Asia's emerging hub for smart and sustainable manufacturing and services, anchored on market-driven policies that empower the private sector while the government actively enables business success. It will highlight priority sectors for promotion to Australia, including mining and mineral processing, renewable energy, agribusiness and food industries, education and training, infrastructure development, IT-BPM, and shared services. The presentation will also cover game-changing reforms that enhance competitiveness and the ease of doing business, while showcasing how the country's strategic location and skilled workforce support long-term growth and shared prosperity.

IMARC EXCHANGE ROUNDTABLES

Step onto the IMARC show floor and into the heart of meaningful conversations at the **IMARC Exchange Roundtables.** With the return of the IMARC **Talk it Forward Dialogues** to the launch of the **Innovation & Investment Alley** program**,** this is where ideas are exchanged, partnerships are sparked, and real solutions take shape, right in the middle of the action.

Talk It Forward Dialogue Table (TiFDT) Program

IMARC's Talk it Forward Dialogue Tables provide a platform for ten representatives to bring their viewpoint and experience on a topic, to debate and engage in challenging conversations and discuss pivotal issues that will drive the mining industry forward, in an open roundtable setting on the showfloor. Conference attendees may listen to the dialogue to gain insights on how the mining sector is progressing and to realistically understand the challenges.

Innovation & Investment Alley Roundtables Program

The Innovation & Investment Alley roundtables at IMARC offer a unique platform for groups of emerging tech innovators to highlight their cutting-edge products and services tailored for the mining sector. These intimate discussions, for audiences to listen in on, connect participants from the Alley with venture capitalists, corporate venture teams, and/or mining innovation leaders. It's a rare opportunity to demonstrate capability, explore collaboration, and align breakthrough solutions with real industry needs; driving the future of mining through innovation.

IMARC NextGen Leaders Industry Speed Networking: Solving Tomorrow's Challenges
Location: Level 3, Room #E3.10

16:00 – 17:30

IMARC NextGen Leaders Industry Speed Networking: Solving Tomorrow's Challenges

A high-energy, facilitated networking experience connecting undergraduate students, graduates and early career professionals with people across the industry.

Rather than traditional networking, each industry leader presents a real-world challenge facing their organisation or the mining sector. Working in small standing groups, participants collaborate to share ideas, discuss solutions and provide fresh perspectives before rotating to the next industry leader.

Participants rotate every 10–12 minutes, engaging with 4–5 industry leaders during the session and contributing to meaningful conversations on the future of the industry.

Example discussion themes may include:

1. Building the Workforce of Tomorrow

- How can mining attract and retain the next generation of talent?
- What would encourage graduates to build long-term careers in mining?
- How do we improve the industry's image with students and early career professionals?

2. The Workplace of 2040

- What does the workplace of 2040 look like?
- How can technology make mining more attractive to young professionals?
- How can FIFO and remote work evolve for the next generation?

3. Leadership & Workplace Culture

- How should leadership evolve for the next generation?
- How do we create workplaces where young people feel they belong?
- How do we better support the wellbeing of young people working on mine sites?

4. Diversity, Inclusion & Belonging

- How do we improve diversity, inclusion and belonging across our workforce?
- How do we create an industry where every young professional can thrive?

5. Challenging Industry Thinking

- What blind spots do industry leaders have when it comes to attracting and developing young talent?
- What opportunities are established leaders missing?
- How should mining communicate with younger generations, and what messaging truly resonates with Gen Z?

Session Format

- 20 industry leaders positioned throughout the room
- Each leader hosts a standing discussion zone, identified by floor decals.
- Participants are allocated to a small group of 6–8 people.
- Each discussion runs for 10–12 minutes before participants rotate.
- Groups capture 2–3 key recommendations on a response card or digital form, which is provided to the industry leader at the end of each discussion.
- The session concludes with informal networking and LinkedIn connections, and all attendees are encouraged to attend the daily IMARC Networking Reception in the IMARC Exhibition Delegate Lounges from 5:30pm

Industry Representatives:

- Dr Tara Djokic, Engagement Officer, Geological Survey of NSW, **NSW Resources**
- Felicia Binks, Director Environment and Sustainability – Australia, **Agnico Eagle**
